**Richard Frank, MD,  
PhD**

*Co-chair, AMA/CPT's  
Digital Medicine Coding  
Committee*

The IEP for DHT is consistent with the continuum from FDA labeling to CPT coding and then CMS/payer coverage envisioned in our article in npj Digital Medicine, Current Procedural Terminology for the Work Done by Machines<sup>1</sup>. In this explication of Appendix S to the CPT Code Set, the “AI Taxonomy”, the authors advocate harmonization of the lexicons, synchronization of the evidentiary standards, and alignment on the impact of the output. **Your IEP is a giant leap toward synchronization, for which I congratulate DiMe as a great service to innovators.**
